RHEA MAE NARAG

Tondo Manila, Philippines | rhea.narag22@gmail.com | linkedin: rhea-mae-narag-192891393

SUMMARY

Dedicated third-year BSIT student with experience in front-end development, UI/UX design, database management, and network topology design through academic projects and organizational involvement. Skilled in developing functional systems, creating user-centered interfaces, and applying analytical problem-solving to technical challenges. Adaptable and eager to learn, with a commitment to applying technical knowledge to real-world projects, collaborating effectively with others, and gaining hands-on industry experience.

EDUCATION

Polytechnic University of the Philippines (PUP)
Degree: Bachelor of Science in Information Systems
Expected Graduation: 2028
Honors: Consistent President's Lister (1st and 2nd Year)
Scholarship: Security Bank Foundation Inc. (SBFI) Scholar

ORGANIZATIONAL EXPERIENCE

CISCO NETCONNECT PUP — Sta. Mesa, Manila
Vice Chief Relations Officer – Community — Sept 2026 – Present

- Coordinates community engagement initiatives and member communication to strengthen organizational relationships and encourage active participation.

MICROSOFT CAMPUS CLUB PUP — Sta. Mesa, Manila
Marketing Strategy Officer — Sept 2026 – Present

- Develops marketing strategies and promotional content to increase awareness of organizational events and encourage student participation.

AWS STUDENT BUILDER GROUP PUP — Sta. Mesa, Manila
UI/UX Designer, Project Development Team — Oct 2026 – Present

- Designs user interfaces and prototypes using Figma to create intuitive, user-centered digital experiences aligned with project requirements.

TECHNICAL SKILLS

Programming: C, Python, Java, SQL, R, COBOL
Front-End Development: HTML, CSS, JavaScript, React
Database Management: MySQL, PostgreSQL
UI/UX Design: Figma, Canva
Developer Tools: Git, GitHub, Vercel, Visual Studio Code
AI Tools: Antigravity CLI, Claude, Gemini, ChatGPT

ACADEMIC PROJECTS

SALN Submission Portal & Database Design | MySQL, Python Flask, JavaScript, HTML, CSS

- Co-developed a full-stack web application alongside a student team using MySQL and Python Flask to collect and process Sworn Statement of Assets, Liabilities, and Net Worth data.
- Engineered backend database interactions and frontend validation logic, leveraging AI tools to accelerate code generation and optimize API request construction.

Enterprise Network Topology Design | Cisco Packet Tracer

- Co-designed an enterprise network architecture integrating core switches using Cisco Packet Tracer to simulate stable ISP connections through a Cisco ASA 5506-X firewall.

- Configured OSPF routing protocols and resolved physical layer interface conflicts to establish proper Layer 3 routing functionality and ensure stable external connectivity.

University Room-Booking App & Interface Redesign | Figma, UI/UX Design

- Redesigned interfaces utilizing Figma and Human-Computer Interaction (HCI) principles to build an effective visual mapping system and mitigate campus room shortages.
- Contributed to a group research paper outlining the UI/UX design process to provide theoretical support for the proposed usability solutions.

ADDITIONAL INFORMATION

Languages: English, Tagalog
Soft Skills: Group Collaboration, Technical Documentation, Logical Debugging, Process Optimization
